**University of Aleppo – Faculty of Informatics Engineering**

Bachelor's Degree in Information Technology

2015 – 2020 | GPA: 86.94

## Work Experience

**.NET Core Full-Stack Web Developer**

Aimstyle – Dubai (Remote) | 2023 – Present

- Developed and maintained responsive web applications using .NET Core and Angular
- Created and integrated RESTful APIs with front-end components
- Built secure authentication systems including token-based and OAuth authentication
- Designed and optimized SQL Server databases and schemas
- Collaborated with UI/UX designers and product managers to deliver robust solutions
- Conducted code reviews and mentored junior developers
- Enhanced performance through caching strategies and optimized queries
- Ensured responsive design for improved mobile and desktop experiences
- Integrated third-party APIs to add functionality and increase usability

### **.NET Core Full-Stack Developer**

BeeCell Markets – Dubai (Remote) | Oct 2023 – Nov 2024

- Developed e-commerce platforms for digital store sales
- Worked with UX/UI teams to improve customer engagement by 35%
- Integrated payment gateways and automated checkout processes, reducing checkout time by 20%
- Optimized front-end assets and back-end code, improving load times by 18%
- Applied SEO strategies resulting in a 25% traffic increase
- Built robust databases and back-end services to support client needs
- Maintained project documentation and coding standards
- Led debugging sessions, performance tuning, and issue resolution
- Ensured responsive web design and user-focused interfaces

### **Full-Stack Developer & Team Lead**

Quality Media – Turkey (On-site) | 2020 – 2023

#### *Key Projects:*

#### 1. E-Learning Platform

- Led a team of 3 developers to design and develop a multi-purpose learning platform
- Supported multiple educational institutions with customizable modules
- Used C#, ASP.NET Core, and SQL Server for the development of core and custom features

#### 2. Translation Conferencing System

- Built a simultaneous translation system using WebRTC, C#, ASP.NET Core, and SignalR
- Enabled host control over translator assignments and speaker management
- Users could choose specific translation languages or listen to the original speaker

#### 3. Cashier Online Order System

- Developed an online order platform including user registration with SMS verification
- Enabled users to browse a digital menu, place orders, and manage addresses and favorites
- Orders were sent directly to the cashier interface for processing

### **Additional Skills**

- Server Management (Linux Ubuntu)
- Conflict Resolution
- Software Best Practices
- Agile Team Leadership
- Web Optimization
- Technical Documentation
